## HERE'S A LOOK AT WHAT WE'RE LEARNING!

### Math

Students will be using addition and subtraction facts to make fact families. Students will need to know that fact families use three numbers to make four equations like the following:

$$2 + 8 = 10$$

$$8 + 2 = 10$$

$$10 - 2 = 8$$

$$10 - 8 = 2$$

### Units

Students will continue to learn about the United States and the World maps. Students will need to know land features in the United States as well as the 7 continents and 5 oceans. A test will be on Friday, September 15.

### Literacy

Students will use story elements when reading fiction books. They will need to know characters, setting, problem, and solution.

They will also need to know question words such as Who?, What?, When?, Where?, Why?, and How?

Students will be learning mainly about the story elements above.

Make sure they know these elements every time they read a fiction book.

Students will also learn about Nouns. Students need to know that a noun refers to a person, place, or thing.
